Alerts

This section summarizes the errors and warnings, as well as any suggestions for improving your site.

- ❗ Event hits must be sent after a pageview hit, but this event hit was not preceded by a pageview. + 2 similar: [1](#) [2](#)
- ❗ This hit is missing the hostname in the URI. + 5 similar: [1](#) [2](#) [3](#) [4](#) [5](#)
- ⚠ This page has two interaction hits within a short time window. The page might have two hits that always fire on page load, which can cause an artificially low bounce rate. + 4 similar: [1](#) [2](#) [3](#) [4](#)
- ❗ This hit starts a new session, most likely because the client ID changed. This is caused by an improper tracking code implementation.
- ⚠ This page took a long time to send a pageview hit to Google Analytics. Users could be clicking away from your site before it records a pageview.

Views summary

This section shows how the recorded hits would appear in the selected Google Analytics views. If the data is not what you expected, review the Flow section below to troubleshoot the problem.
